

# ARE YOU STILL IPAC COMPLIANT?

Following the Science and Public Health Ontario Guidance

As our Industry continues to navigate through new challenges, we rely on our training, science, and commitment to provide the best care possible.

As clinicians, we are far more likely to stay in compliance when we understand the foundation of the science that helps to create the guidance.

What is a PCD? Can I flash sterilize? What's the frequency for biological monitoring?

Join us for a practical review of IPAC Standards of Practice, so that you can confirm that YES, you are still compliant!

## FEATURED SPEAKER

**April Smith**

*Lakeshore Dental Consultants Inc.*

April has been educating and motivating dental clinicians for over 25 years.

She provides compliance training including Occupational Health and Safety, WHMIS, and AODA. April is also an infection control specialist with expertise in dental unit waterline management. She has provided lectures to Ontario Public Health Units, The Canadian Institute for Public Health Inspectors, regulatory and membership organizations, study clubs and dental distributors.

Her clear and concise delivery is well respected by dentists, denturists, hygienists and dental assistants throughout Ontario. Her passion for the industry comes through in her ability to coach and guide clients through new learning experiences and she is recognized as always providing the most current and relevant information in her engaging presentations.
