Experience a game-changing method of Black Triangle treatments

Don't miss this exclusive opportunity with the master, Dr. David Clark illustrates a new generation of Black Triangle restorations with a hands-on demonstration. This engaging course dives into a minimally invasive approach for treating those troublesome Black Triangles, enabling you to close gaps between teeth in a single appointment. Traditionally, composites were applied into the tooth, but now we have the ability to apply them around the tooth. Today, injection molding of composites with modern preparations, super-anatomic clear matrices, and heated multi-viscosity composite can solve so many problems without resorting to crowns.

**This course will give you a basic understanding of additive dentistry so you can start treating Black Triangles in your practice immediately.**

### Learning Topics

- + Learn the pillars for Black Triangle restorations
- + Understand how to eliminate unfamiliar negative space with additive dentistry
- + Learn to rejuvenate the teeth for a youthful appearance
