Join Us for an Exclusive Webinar on Anterior Restorations!

PEG LATERALS

DEEP CARRIES

Discover the latest techniques and overcome the challenges of anterior restorations with guidance from the founder of Bioclear, Dr. David Clark!

how to effectively use Bioclear HD Anterior Matrices—featuring heavy-duty (HD) mylar—for superior results in anterior restorations.

**What You'll Learn:**

- + How to treat maxillary and mandibular incisors and canines
- + Applications for simple Class III and IV restorations, fractured teeth, and complex incisal edge reconstructions
- + Solutions for minor instant ortho, black triangle closures, peg laterals, and diastema closures

The HD mylar is stronger and more rigid than traditional mylar, and is designed for self-stabilizing placement, making the process faster and more efficient. These matrices are a MUST among dentists for their simplicity and precision.

**Don't miss this incredible learning opportunity with the incredible Dr. David Clark to elevate your anterior restoration techniques!**
