In today's changing world of dentistry, the reality is that some dentists will remain strong and thriving a year or two from now, but many more won't. Which one will you be?

Now is the time we need new insights, tools, strategies, and skills more than ever before.

Discover when, why, and how to incorporate CAD/CAM and new digital technology into your practice.

About the speaker:

DR. AGATHA BIS

Dr. Agatha Bis has long known that the secret to a thriving dental practice is innovation and communication. Her unique style of blending modern dental practice with digital technology and cutting-edge business systems has helped many dentists accomplish growth and success in any economy.
