

FROM SCAN TO SPLINT

What are the steps when going from scanning to 3D printing?
Why is this one of the biggest trends in dentistry today?

Join us for an evening where we will be showing you the digital process with a hands-on demonstration of scanning, splint design and printing, while enjoying drinks and appetizers.

Hear from our featured presenter and local dentist **Dr. Sunny Virdi** on why he implements these tools in his practice and how it makes his everyday dentistry more efficient while at the same time increasing his clinic's revenue.

Special guests in attendance are **Julie Van Niekerk** from Align Technology, and **Gerald Tornato** from SprintRay. With the help from Dr. Sunny Virdi, they will be performing a live demonstration showcasing the full splint production workflow.

We will be reviewing intraoral scanning with iTero, the SprintRay Cloud Design process, and finally printing the splint on the SprintRay Pro S printer.

Tuesday, February 13, 2024

6:00pm-8:30pm

6:00pm-6:30pm - refreshments and registration

Blaze Bistro & Lounge at the Delta Hotel,

350 St Mary Ave, Winnipeg, MB R3C 3J2

LEARNING OBJECTIVES

- + Provide an Overview...**
of the scan-to-print digital workflow for dental 3D in-office printing.
- + Demonstrate...**
how the digital in-office workflow can help dentists deliver appliances while reducing costs and lead times.
- + Gain Understanding...**
of available design services and materials for 3D printing while at the same time learning how to best utilize your scanner to increase clinic revenues.

Dr. Sunny Virdi, born in Winnipeg, Manitoba, obtained his D.M.D from the University of Manitoba in 2016. He maintains a group private practice with a focus on comprehensive and aesthetic dentistry. Dr. Virdi has published multiple articles for aesthetic journals and shares his passion for restorative dentistry through nationally recognized hands-on programs and international symposiums. He also serves as a consultant for multiple leading manufacturers in product evaluations.
