

HEALTH & SAFETY AWARENESS

You're now IPAC compliant but are you health & safety compliant?

Public Health Ontario, RCDSO and CDHO remind us that all Ontario employers and employees are subject to the requirements of the Occupational Health and Safety Act (OHSA).

- What are your rights under OHSA?
- Do you need a Naloxone Kit?
- Is your Health & Safety Board up to date?
- What happens during a workplace inspection?

Start your journey by joining us for an evening refresher, then register to continue the series with WHMIS and AODA training so you can check all the boxes and confirm that "YES! I am fully compliant!"

FEATURED SPEAKER

April Smith

Lakeshore Dental Consultants Inc.

April has been educating and motivating dental clinicians for over 25 years.

She provides compliance training including Occupational Health and Safety, WHMIS, and AODA. April is also an infection control specialist with expertise in dental unit waterline management. She has provided lectures to Ontario Public Health Units, The Canadian Institute for Public Health Inspectors, regulatory and membership organizations, study clubs and dental distributors.

Her clear and concise delivery is well respected by dentists, denturists, hygienists and dental assistants throughout Ontario. Her passion for the industry comes through in her ability to coach and guide clients through new learning experiences and she is recognized as always providing the most current and relevant information in her engaging presentations.
