

# INNOVATIONS IN DENTISTRY

Thursday, December 1, 2022 • 6:00pm to 9:00pm

**Sinclair Dental**

110-2611 Queensview Drive  
Ottawa, ON K2B 8K2

This highly informative seminar will review how technologies have changed our diagnosis and treatment of our patients. We are now able to identify and treat caries, periodontal disease and failing endodontic restorations sooner than we ever could before. These exciting technologies bring the dental community to a bright, new age of dentistry for doctors, hygienists, staff and very importantly our patients.

## LECTURE HIGHLIGHTS:

- ✦ Learn how to incorporate technologies throughout your office (lasers), as well as the wide range of benefits they have in clinical dentistry
- ✦ Understand how YSGG technology positively impacts the patients' experience and benefits from their uses
- ✦ Learn everyday clinical uses for YSGG lasers, how they ease patients' concerns and provide improved clinical outcomes
- ✦ Clear understanding of insurance billing, patient education & materials and how to attract the right type of new patients with laser technology
- ✦ Learn how hygiene lasers can be used as an adjunct to scaling/rootplaning and periodontal surgery to treat periodontal disease, as well as discuss the plethora of research supporting the exceptional clinical results
- ✦ Learn additional laser practice building applications for treating dentinal sensitivity, herpetic lesions, veneer removal, and peri-implantitis treatment
- ✦ Learn how to improve the long term success of bonded restorations
- ✦ Learn how YSGG lasers dramatically & predictably increase the level of success of endodontic

**TUITION: \$49 | PACE CE Credits provided**

## LIMITED SEATS AVAILABLE!
