PRESENTER:

Ted Gray

Western Regional Manager, SciCan

SciCan

He has worked for SciCan for over 30 years and is considered an expert on infection control policies in Canada. He is known for his hands-on lectures and courses in Western Canada and has done thousands of in office training courses and office inspections. He works closely with the Canadian Standards Association Technical Advisory Committee (CSA) and he is a member of OSAP, The Organization for Safety Asepsis and Prevention.

GUEST SPEAKER:

Nate Wise

Sterilization Specialist, Solventum

Solventum

Infection control has been considered an integral part of the patient care. By understanding the infectious disease process and how it is impacted by proper infection control protocols, we can reduce the risk of infection for both – patients and practitioners.

This lecture will help you to:

- + **Understanding Our Risk:** A break down of the new organisms we face
- + **Assessing Disinfection or Sterilization Processes:** What, when, why, where and how safe are our chemicals
- + **Education and Training, Written Policies and Procedures:** The role of the infection control officer
- + **Factors Affecting the Efficacy of the Reprocessing Procedure:** Why does sterilization fail?
- + **Transportation and Handling of Contaminated Medical Equipment/Devices**
- + **Cleaning Instruments and Handpieces:** Ultrasonic cleaner, automated instrument washers, and handpiece lubrication equipment
- + **Sterilization of Reusable Equipment/Devices**
- + **Storage and Use of Reprocessed Equipment**
